

**Syllabus of  
B. Sc. (Regular) with Computer Science**

**(CHOICE BASED CREDIT SYSTEM)**

**This is approved in the Academic Council held on 8/11/2019**

## **B.Sc. PROGRAM WITH COMPUTER SCIENCE (Regular):**

### **Program Objectives:**

Upon successful completion of a general course in computer science, students will be able to:

1. Demonstrate proficiency in problem-solving techniques using the computer.
2. Demonstrate proficiency in at least one high-level programming language and one operating system.
3. Demonstrate proficiency in the analysis of complex problems and the synthesis of solutions to those problems.
4. Demonstrate comprehension of modern software engineering principles.
5. Demonstrate a breadth and depth of knowledge in the discipline of computer science.

### **Program Learning Outcomes:**

The goals of the computer science department are to prepare students for graduate training in some specialized area of computer science, to prepare students for jobs in industry, business or government, and to provide support courses for students in technology, mathematics and other fields requiring computing skills.

### **Program Structure:**

The B. Sc program with Computer Science (Regular) is a three-year course divided into six-semesters. A student is required to complete 132 credits for the completion of the course and the award of the degree.

|                   | <b>Year</b> | <b>Semester</b>   | <b>Semester</b>    |
|-------------------|-------------|-------------------|--------------------|
| <b>Part- I</b>    | First Year  | Semester – I : 22 | Semester – II : 22 |
| <b>Part - II</b>  | Second Year | Semester – III:22 | Semester – IV: 22  |
| <b>Part – III</b> | Third Year  | Semester – V: 22  | Semester – VI: 22  |

### **Program Implementation Requirement:**

The program is a three-year course divided into six-semesters. For proper implementation of the UGCBCS program the following infrastructure are necessary:

- (a) Sufficient lab facilities with computers and software
- (b) At least 3 full teaching faculties.

### **Instruction for questions paper setter:**

Question Paper setter should set from the prescribed text books, mentioned in the syllabus.

# Course Structure

Details of courses under (B.Sc. with Computer Science Regular):

| Course                                                                                                                      | *Credits           |                   |
|-----------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------|
|                                                                                                                             | Theory + Practical | Theory + Tutorial |
| <b>I. Core Course (6 Credits)</b>                                                                                           |                    |                   |
| <b>(12 Papers)</b>                                                                                                          | 12X4= 48           | 12X5=60           |
| 04 Courses from each of the 03 disciplines of choice                                                                        |                    |                   |
| <b>Core Course Practical / Tutorial*</b>                                                                                    |                    |                   |
| <b>(12 Practical/Tutorials*)</b>                                                                                            | 12X2=24            | 12X1=12           |
| 04 Courses from each of the 03 disciplines of choice                                                                        |                    |                   |
| <b>II. Elective Course (6 Credits)</b>                                                                                      |                    |                   |
| <b>(6 Papers)</b>                                                                                                           | 6X4=24             | 6X5=30            |
| Two papers from each discipline of choice including paper of interdisciplinary nature                                       |                    |                   |

|          |                                                                     |                                                             |                                                                                                                                                           | DSE – 3B                                                                                                                                                                                                                                                                             |

# Detailed Syllabus

## CSC-RC-1016: Problem Solving using Computers

4 Lectures, 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

End Semester Marks:

Theory: 60 Marks, Practical: 20 Marks

Internal Marks:

Sessional: 10 Marks, Practical: 6 Marks, Attendance: 4 Marks

### **UNIT 1: Computer Fundamentals (3 Lectures)**

Introduction to Computers: Characteristics of Computers, Uses of computers, Types and generations of Computers.

### **UNIT 2: Basic Computer Organization (4 Lectures)**

Basic Computer Organization - UNITS of a computer, CPU, ALU, memory hierarchy, registers, I/O devices.

### **UNIT 3: Planning the Computer Program (3 Lectures)**

Concept of problem solving, Problem definition, Program design, Debugging, Types of errors in programming, Documentation.

### **UNIT 4: Techniques of Problem Solving (4 Lectures)**

Flowcharting, decision table, algorithms, Structured programming concepts, Programming methodologies viz. top-down and bottom-up programming.

### **UNIT 5: Overview of Programming (4 Lectures)**

Structure of a Python Program, Elements of Python

### **UNIT 6: Introduction to Python (8 Lectures)**

Python Interpreter, Using Python as calculator, Python shell, Indentation. Atoms, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical or Boolean operator, Assignment, Operator, Ternary operator, Bit wise operator, Increment or Decrement operator).

### **UNIT 7: Creating Python Programs (10 Lectures)**

Input and Output Statements, Control statements (Looping- while Loop, for Loop, Loop Control, Conditional Statement- if...else, Difference between break, continue and pass).

### **UNIT 8: Structures (10 Lectures)**

Numbers, Strings, Lists, Tuples, Dictionary, Date & Time, Modules, Defining Functions, Exit function, default arguments.

### **UNIT 9: Introduction to Advanced Python (14 Lectures)**

Objects and Classes, Inheritance, Regular Expressions, Event Driven Programming, GUI

Programming.

## REFERENCE BOOKS:

1. P. K. Sinha & Priti Sinha , “Computer Fundamentals”, BPB Publications, 2007.
2. Dr. Anita Goel, Computer Fundamentals, Pearson Education, 2010.
3. T. Budd, Exploring Python, TMH, 1st Ed, 2011
4. Python Tutorial/Documentation [www.python.org](http://www.python.org) 2010
5. Allen Downey, Jeffrey Elkner, Chris Meyers , How to think like a computer scientist : learning with Python , Freely available online.2012
6. <http://docs.python.org/3/tutorial/index.html>
7. <http://interactivepython.org/courselib/static/pythonds>
8. <http://www.ibiblio.org/g2swap/byteofpython/read/>

## LABORATORY:

### **Section: A ( Simple programs)**

1. Write a menu driven program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user’s choice.
2. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria :
  - Grade A: Percentage  $\geq 80$
  - Grade B: Percentage  $\geq 70$  and  $< 80$
  - Grade C: Percentage  $\geq 60$  and  $< 70$
  - Grade D: Percentage  $\geq 40$  and  $< 60$
  - Grade E: Percentage  $< 40$
3. Write a menu-driven program, using user-defined functions to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
4. WAP to display the first n terms of Fibonacci series.
5. WAP to find factorial of the given number.
6. WAP to find sum of the following series for n terms:  $1 - 2/2! + 3/3! - \dots - n/n!$
7. WAP to calculate the sum and product of two compatible matrices.

### **Section: B (Visual Python):**

*All the programs should be written using user defined functions, wherever possible.*

1. Write a menu-driven program to create mathematical 3D objects
  - I. curve
  - II. sphere

- III. cone
- IV. arrow
- V. ring
- VI. Cylinder.

2. WAP to read n integers and display them as a histogram.
3. WAP to display sine, cosine, polynomial and exponential curves.
4. WAP to plot a graph of people with pulse rate p vs. height h. The values of p and h are to be entered by the user.
5. WAP to calculate the mass m in a chemical reaction. The mass m (in gms) disintegrates according to the formula  $m=60/(t+2)$ , where t is the time in hours. Sketch a graph for t vs. m, where  $t \geq 0$ .
6. A population of 1000 bacteria is introduced into a nutrient medium. The population p grows as follows:
 
$$P(t) = (15000(1+t))/(15+ e)$$
 where the time t is measured in hours. WAP to determine the size of the population at given time t and plot a graph for P vs t for the specified time interval.
7. Input initial velocity and acceleration, and plot the following graphs depicting equations of motion:
  - I. velocity wrt time ( $v=u+at$ )
  - II. distance wrt time ( $s=u*t+0.5*a*t*t$ )
  - III. distance wrt velocity ( $s=(v*v-u*u)/2*a$ )

## **CSC-RC-2016 : Database Management Systems**

4 Lectures 4 Practical, Credits 6 (4+2)  
Theory: 60 Lectures, Practical: 60 Lectures

### **UNIT 1: Introduction to Database Management Systems (10 Lectures)**

Characteristics of database approach, data models, DBMS architecture and data independence.

### **UNIT 2: Entity Relationship and Enhanced ER Modelling (15 Lectures)**

Entity types, relationships, SQL- 99: Schema Definition, constraints, and object modeling.

### **UNIT 3: Relational Data Model (15 Lectures)**

Basic concepts, relational constraints, relational algebra, SQL queries.

### **UNIT 4: Database Design (20 Lectures)**

ER and EER to relational mapping, functional dependencies, normal forms up to third normal form.

### **REFERENCE BOOKS:**

1. R. Elmasri, S.B. Navathe, Fundamentals of Database Systems 6th Edition, Pearson Education, 2010.
2. R. Ramakrishnan, J. Gehrke, Database Management Systems 3rd Edition, McGraw-Hill, 2002.
3. A. Silberschatz, H.F. Korth, S. Sudarshan, Database System Concepts 6th Edition, McGraw Hill, 2010.
4. R. Elmasri, S.B. Navathe, Database Systems Models, Languages, Design and application Programming, 6 Edition, Pearson Education, 2013.

## **Software Lab based on Database Management Systems**

**Note: MyAccess/MySQL may be used.**

The following concepts must be introduced to the students:

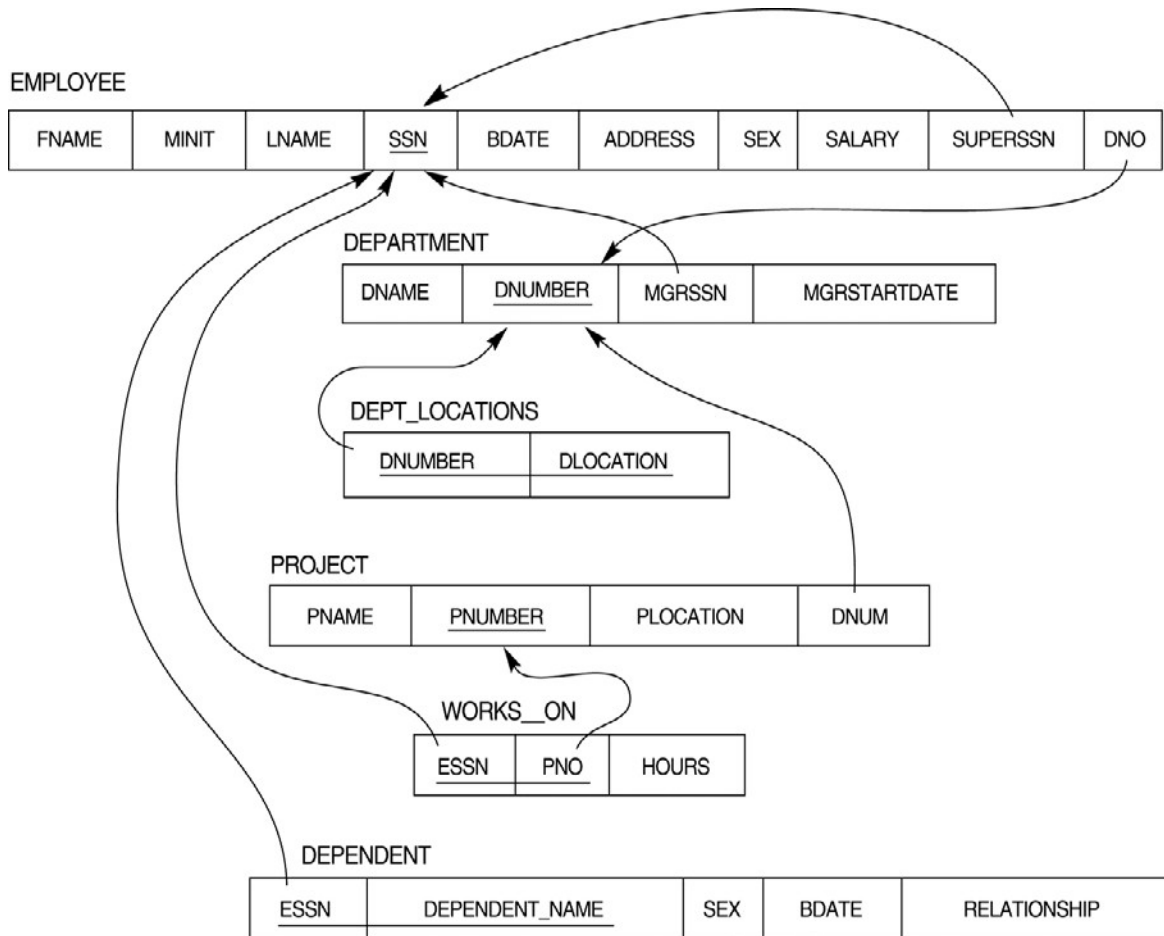

#### **DDL Commands**

- Create table, alter table, drop table

#### **DML Commands**

- Select , update, delete, insert statements
- Condition specification using Boolean and comparison operators (and, or, not, =, <, >, <=, >=, <=)
- Arithmetic operators and aggregate functions (Count, sum, avg, Min, Max)
- Multiple table queries (join on different and same tables)
- Nested select statements
- Set manipulation using (any, in, contains, all, not in, not contains, exists, not exists, union, intersect, minus, etc.)
- Categorization using group by.....having
- Arranging using order by

## Relational Database Schema - COMPANY

### Questions to be performed on above schema

1. Create tables with relevant foreign key constraints
2. Populate the tables with data
3. Perform the following queries on the database :
  1. Display all the details of all employees working in the company.
  2. Display ssn, lname, fname, address of employees who work in department no 7.
  3. Retrieve the birthdate and address of the employee whose name is 'Franklin T. Wong'
  4. Retrieve the name and salary of every employee
  5. Retrieve all distinct salary values
  6. Retrieve all employee names whose address is in 'Bellaire'

7. Retrieve all employees who were born during the 1950s
8. Retrieve all employees in department 5 whose salary is between 50,000 and 60,000(inclusive)
9. Retrieve the names of all employees who do not have supervisors
10. Retrieve SSN and department name for all employees
11. Retrieve the name and address of all employees who work for the 'Research' department
12. For every project located in 'Stafford', list the project number, the controlling department number, and the department manager's last name, address, and birthdate.
13. For each employee, retrieve the employee's name, and the name of his or her immediate supervisor.
14. Retrieve all combinations of Employee Name and Department Name
15. Make a list of all project numbers for projects that involve an employee whose last name is 'Narayan' either as a worker or as a manager of the department that controls the project.
16. Increase the salary of all employees working on the 'ProductX' project by 15%. Retrieve employee name and increased salary of these employees.
17. Retrieve a list of employees and the project name each works in, ordered by the employee's department, and within each department ordered alphabetically by employee first name.
18. Select the names of employees whose salary does not match with salary of any employee in department 10.
19. Retrieve the name of each employee who has a dependent with the same first name and same sex as the employee.
20. Retrieve the employee numbers of all employees who work on project located in Bellaire, Houston, or Stafford.
21. Find the sum of the salaries of all employees, the maximum salary, the minimum salary, and the average salary. Display with proper headings.
22. Find the sum of the salaries and number of employees of all employees of the 'Marketing' department, as well as the maximum salary, the minimum salary, and the average salary in this department.
23. Select the names of employees whose salary is greater than the average salary of all employees in department 10.
24. For each department, retrieve the department number, the number of employees in the department, and their average salary.
25. For each project, retrieve the project number, the project name, and the number of employees who work on that project.

26. Change the location and controlling department number for all projects having more than 5 employees to 'Bellaire' and 6 respectively.
27. For each department having more than 10 employees, retrieve the department no, no of employees drawing more than 40,000 as salary.
28. Insert a record in Project table which violates referential integrity constraint with respect to Department number. Now remove the violation by making necessary insertion in the Department table.
29. Delete all dependents of employee whose ssn is '123456789'.
30. Delete an employee from Employee table with ssn = '12345'( make sure that this employee has some dependents, is working on some project, is a manager of some department and is supervising some employees). Check and display the cascading effect on Dependent and Works on table. In Department table MGRSSN should be set to default value and in Employee table SUPERSSN should be set to NULL
31. Perform a query using alter command to drop/add field and a constraint in Employee table.

# **CSC-RC-3016: Operating Systems**

4 Lectures 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

## **UNIT 1: Introduction**

**(2 Lectures)**

System Software, Resource Abstraction, OS strategies.

## **UNIT 2: Types of operating systems**

**(2 Lectures)**

Multiprogramming, Batch, Time Sharing, Single user and Multiuser, Process Control & Real Time Systems.

## **UNIT 3: Operating System Organization**

**(10 Lectures)**

Factors in operating system design, basic OS functions, implementation consideration; process modes, methods of requesting system services – system calls and system programs.

## **UNIT 4: Process Management**

**(15 Lectures)**

System view of the process and resources, initiating the OS, process address space, process abstraction, resource abstraction, process hierarchy, Thread model.

## **UNIT 5: Scheduling**

**(12 Lectures)**

Scheduling Mechanisms, Strategy selection, non-pre-emptive and pre-emptive strategies.

## **UNIT 6: Memory Management**

**(12 Lectures)**

Mapping address space to memory space, memory allocation strategies, fixed partition, variable partition, paging, virtual memory

## **UNIT 7: Shell Introduction and Shell Scripting**

**(7 Lectures)**

1. What is shell and various type of shell, Various editors present in linux
2. Different modes of operation in vi editor
3. What is shell script, Writing and executing the shell script
4. Shell variable (user defined and system variables)
5. System calls, Using system calls
6. Pipes and Filters
7. Decision making in Shell Scripts (If else, switch), Loops in shell
8. Functions
9. Utility programs (cut, paste, join, tr , uniq utilities)
10. Pattern matching utility (grep)

## REFERENCE BOOKS:

1. A Silberschatz, P.B. Galvin, G. Gagne, Operating Systems Concepts, 8<sup>th</sup> Edition, John Wiley Publications 2008.
2. A.S. Tanenbaum, Modern Operating Systems, 3<sup>rd</sup> Edition, Pearson Education 2007.
3. G. Nutt, Operating Systems: A Modern Perspective, 2<sup>nd</sup> Edition Pearson Education 1997.
4. W. Stallings, Operating Systems, Internals & Design Principles, 5<sup>th</sup> Edition, Prentice Hall of India. 2008.
5. M. Milenkovic, Operating Systems- Concepts and design, Tata McGraw Hill 1992.

## SOFTWARE LAB BASED ON OPERATING SYSTEMS

**Note: Following exercises can be performed using Linux or Unix**

1. Usage of following commands:  
ls, pwd, tty, cat, who, who am I, rm, mkdir, rmdir, touch, cd.
2. Usage of following commands:  
cal, cat(append), cat(concatenate), mv, cp, man, date.
3. Usage of following commands:  
chmod, grep, tput (clear, highlight), bc.
4. Write a shell script to check if the number entered at the command line is prime or not.
5. Write a shell script to modify “cal” command to display calendars of the specified months.
6. Write a shell script to modify “cal” command to display calendars of the specified range of months.
7. Write a shell script to accept a login name. If not a valid login name display message – “Entered login name is invalid”.
8. Write a shell script to display date in the mm/dd/yy format.
9. Write a shell script to display on the screen sorted output of “who” command along with the total number of users .
10. Write a shell script to display the multiplication table any number,
11. Write a shell script to compare two files and if found equal asks the user to delete the duplicate file.
12. Write a shell script to find the sum of digits of a given number.
13. Write a shell script to merge the contents of three files, sort the contents and then display them page by page.
14. Write a shell script to find the LCD(least common divisor) of two numbers.
15. Write a shell script to perform the tasks of basic calculator.
16. Write a shell script to find the power of a given number.
17. Write a shell script to find the factorial of a given number.
18. Write a shell script to check whether the number is Armstrong or not.
19. Write a shell script to check whether the file have all the permissions or not.
20. Program to show the pyramid of special character “\*”.

## **CSC-SE-3014: Office Automation Tools**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

**UNIT 1: Introduction to open office/MS office/Libre office** (3 Lectures)

**UNIT 2: Word Processing** (6 Lectures)

Formatting Text, Pages, Lists, Tables

**UNIT 3: Spreadsheets** (6 Lectures)

Worksheets, Formatting data, creating charts and graphs, using formulas and functions, macros, Pivot Table

**UNIT 4: Presentation Tools** (5 Lectures)

Adding and formatting text, pictures, graphic objects, including charts, objects, formatting slides, notes, hand-outs, slide shows, using transitions, animations.

### **REFERENCE BOOKS:**

1. Sushila Madan , Introduction to Essential tools, JBA, 2009.
2. Anita Goel, Computer Fundamentals, Pearson, 2012

### **COMPUTER LAB BASED ON OFFICE AUTOMATION:**

#### **Practical List for WORD:**

1. Create a **telephone directory**.

- The heading should be 16-point Arial Font in bold
- The rest of the document should use 10-point font size
- Other headings should use 10-point Courier New Font.
- The footer should show the page number as well as the date last updated.

2. Design a time-table form for your college.

- The first line should mention the name of the college in 16-point Arial Font and should be bold.
- The second line should give the course name/teacher's name and the department in 14-point Arial.
- Leave a gap of 12-points.
- The rest of the document should use 10-point Times New Roman font.
- The footer should contain your specifications as the designer and date of creation.

3. Create the following one page documents.

- (a) Compose a note inviting friends to a get-together at your house, including a list of things to bring with them.

- (b) Design a certificate in landscape orientation with a border around the document.
4. Create the following document: A newsletter with a headline and 2 columns in portrait orientation, including at least one image surrounded by text.
5. Convert following text to a table, using comma as delimiter

Type the following as shown (do not bold).

**Color, Style, Item**

**Blue, A980, Van**

**Red, X023, Car**

**Green, YL724, Truck**

**Name, Age, Sex**

**Bob, 23, M**

**Linda, 46, F**

**Tom, 29, M**

6. Prepare a grocery list having four columns (Serial number, the name of the product, quantity and price) for the month of April, 06.
- Font specifications for Title (Grocery List): 14-point Arial font in bold and italics.
  - The headings of the columns should be in 12-point and bold.
  - The rest of the document should be in 10-point Times New Roman.
  - Leave a gap of 12-points after the title.
7. XYZ Publications plans to release a new book designed as per your syllabus. Design the first page of the book as per the given specifications.
- (a) The title of the book should appear in bold using 20-point Arial font.
- (b) The name of the author and his qualifications should be in the center of the page in 16-point Arial font.
- (c) At the bottom of the document should be the name of the publisher and address in 16-point Times New Roman.
- (d) The details of the offices of the publisher (only location) should appear in the footer.
8. Create the following one page documents.
- a) Design a Garage Sale sign.
- b) Make a sign outlining your rules for your bedroom at home, using a numbered list.
9. Enter the following data into a table given on the next page.

| <b>Salesperson</b> | <b>Dolls</b> | <b>Trucks</b> | <b>Puzzles</b> |
|--------------------|--------------|---------------|----------------|
| Amit               | 1327         | 1423          | 1193           |
| Shivi              | 1421         | 3863          | 2934           |
| Om                 | 5214         | 3247          | 5467           |
| Ananya             | 2190         | 1278          | 1928           |
| Anupama            | 1201         | 2528          | 1203           |
| Maharshi           | 4098         | 3079          | 2067           |

Add a column Region (values: S, N, N, S, S, S) between the Salesperson and Dolls columns to the given table Sort your table data by Region and within Region by Salesperson in ascending order:

**Practical List for EXCEL**

Q1. Create a student worksheet containing roll numbers, names and total marks. Open a document in Word and insert the excel worksheet using:-

- i) Copy/Paste
- ii) Embedding
- iii) Linking

Q2. The term wise marks for APS class of 20 students are stored in 3 separate sheets named term1, term2 and term3. Create 4<sup>th</sup> worksheet that contains student names and their total and average marks for the entire year. Give proper headings using headers. Make the column headings bold and italic. The 4<sup>th</sup> worksheet should contain college name as the first line. Make it bold, italic and center it.

Q3. Using a simple pendulum, plot 1-T and 1-T<sup>2</sup> graph.

| I   | t1 | t2 | t3 | Mean(t) | T=t/20 | T <sub>2</sub> |
|-----|----|----|----|---------|--------|----------------|
| 70  |    |    |    |         |        |                |
| 80  |    |    |    |         |        |                |
| 90  |    |    |    |         |        |                |
| 100 |    |    |    |         |        |                |

Q4. Consider the following employee worksheet:-

| Full Name (First Last) | Grade 1/2/3 | Basic Salary | HRA | PF | Gross | Net | (VA) Vehicle Allowance |
|------------------------|-------------|--------------|-----|----|-------|-----|------------------------|
|                        |             |              |     |    |       |     |                        |
|                        |             |              |     |    |       |     |                        |

HRA is calculated as follows:

Grade            HRA %(of Basic)

1                    40%

2                    35%

3                    30%

Gross = Basic + HRA + VA

Net = Gross –PF

PF is 8% for all Grades

VA is 15000, 10000 and 7000 for Grades 1, 2 and 3.

- i) Find max, min and average salary of employees in respective Grade
- ii) Count no. of people where VA>HRA
- iii) Find out most frequently occurring grade.
- iv) Extract records where employee name starts with “A” has HRA>10000
- v) Print Grade wise report of all employees with subtotals of net salary and also grand totals. Use subtotal command.
- vi) Extract records where Grade is 1 or 2 and salary is between 10000 and 20000 both inclusive.

Q5. In a meeting of a marketing department of an organization it has been decided that price of selling an item is fixed at Rs40. It was resolved to increase the sell of more of more

items and getting the profit of Rs40,000/.Use Goal Seek of find out how many items you will have to sell to meet your profit figure.

- Q6. To study the variation in volume with pressure for a sample of an air at constant temperature by plotting a graph for P – V and P-I/V. Sample observations are:-

| Pressure(P) | Volume (V) | I/V | PV | P/V |
|-------------|------------|-----|----|-----|
| 75          | 20         |     |    |     |
| 78.9        | 19         |     |    |     |
| 83.3        | 18         |     |    |     |
| 88.2        | 17         |     |    |     |

- Q7. Plot the chart for marks obtained by the students (out of 5) vs. frequency (total number of students in class is 50).

- Q8. Create the following worksheet(s) containing an year wise sale figure of five salesmen in Rs.

| Salesman | 2002  | 2003  | 2004   | 2005  |
|----------|-------|-------|--------|-------|
| MOHAN    | 10000 | 12000 | 20000  | 50000 |
| MITRA    | 15000 | 18000 | 50000  | 60000 |
| SHIKHA   | 20000 | 22000 | 70000  | 70000 |
| ROHIT    | 30000 | 30000 | 100000 | 80000 |
| MANGLA   | 40000 | 45000 | 125000 | 90000 |

Apply the following Mathematical & Statistical functions:

- i) Calculate the commission for each salesman under the condition :-
  - a) If total sales is greater than Rs. 3, 00,000/-, then commission is 10% of total sale made by the salesman.
  - b) Otherwise, 4% of total sale.
- ii) Calculate the maximum sale made by each salesman.
- iii) Calculate the maximum sale made in each year.
- iv) Calculate the minimum sale made by each salesman.
- v) Calculate the minimum sale made in each year.
- vi) Count the no. of sales persons.
- vii) Calculate the cube of sales made by Mohan in the year 2002.
- viii) Find the difference in sales by salesman Mitra between the year 2002 and 2003.  
Find the absolute value of difference.
- ix) Also calculate the Mode, Stddev, Variance, Median for the sale made by each salesman.
- ix) Calculate the year wise Correlation coefficient between the sales man Mohan and Mitra year wise

- Q9. The following table gives an year wise sale figure of five salesmen in Rs.

| Salesman | 2000  | 2001  | 2002   | 2003  |
|----------|-------|-------|--------|-------|
| S1       | 10000 | 12000 | 20000  | 50000 |
| S2       | 15000 | 18000 | 50000  | 60000 |
| S3       | 20000 | 22000 | 70000  | 70000 |
| S4       | 30000 | 30000 | 100000 | 80000 |
| S5       | 40000 | 45000 | 125000 | 90000 |

- v) Calculate total sale year wise.
- vi) Calculate the net sales made by each salesman
- vii) Calculate the commission for each salesman under the condition :-
  - c) If total sales is greater than Rs. 4, 00,000/-, then commission is 5% of total sale made by the salesman.
  - d) Otherwise, 2% of total sale.
- viii) Calculate the maximum sale made by each salesman.
- ix) Calculate the maximum sale made in each year.
- x) Draw a bar graph representing the sale made by each salesman.
- xi) Draw a pie graph representing the sale made by salesmen in year 2001.

Q10. Consider the following worksheet for APS 1<sup>st</sup> year students:-

| S.No. | Name | PH | CH | BY | MT | CS | Total Marks | % | Grade |
|-------|------|----|----|----|----|----|-------------|---|-------|
| 1     |      |    |    |    |    |    |             |   |       |
| 2     |      |    |    |    |    |    |             |   |       |

Grade is calculated as follows:-

If %  $\geq 90$  Grade A

If %  $\geq 80$  &  $< 90$  Grade B

If %  $\geq 70$  &  $< 80$  Grade C

If %  $\geq 60$  &  $< 70$  Grade D

Otherwise students will be declared fail.

- i) Calculate Grade using if function
- ii) Sort the data according to total marks
- iii) Apply filter to display the marks of the students having more than 65% marks.
- iv) Draw a pie chart showing % marks scored in each subject by the topper of the class.
- v) Draw the doughnut chart of the data as in (iv)
- vi) Enter the S.No. of a student and find out the Grade of the student using VLOOKUP.
- vii) Extract all records where name
  - a) Begins with "A"
  - b) Contains "A"
  - c) Ends with "A"

**Practical List for Power Point:**

1. Create five Power point slides. Each slide should support different format. In these slides explain areas of applications of IT. Make slide transition time as 10 seconds.
2. Create five Power Point slides to give advantages/disadvantages of computer, application of computers and logical structure of computer.
3. Create five Power Point slides detailing the process of internal assessment. It should be a self-running demo.

## **CSC-SE-3024: Multimedia Applications**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

### **UNIT 1: Multimedia** (2 Lectures)

Introduction to multimedia, Components, Uses of multimedia.

### **UNIT 2: Making Multimedia** (4 Lectures)

Stages of a multimedia project, Requirements to make good multimedia, Multimedia Hardware - Macintosh and Windows production Platforms, Hardware peripherals - Connections, Memory and storage devices, Multimedia software and Authoring tools.

### **UNIT 3: Text** (2 Lectures)

Fonts & Faces, Using Text in Multimedia, Font Editing & Design Tools, Hypermedia & Hypertext.

### **UNIT 4: Images** (3 Lectures)

Still Images – Bitmaps, Vector Drawing, 3D Drawing & rendering, Natural Light & Colors, Computerized Colors, Color Palletes, Image File Formats.

### **UNIT 5: Sound** (3 Lectures)

Digital Audio, MIDI Audio, MIDI vs Digital Audio, Audio File Formats.

### **UNIT 5: Video** (3 Lectures)

How Video Works, Analog Video, Digital Video, Video File Formats, Video Shooting and Editing.

### **UNIT 6: Animation** (3 Lectures)

Principle of Animations. Animation Techniques, Animation File Formats.

### **BOOKS RECOMMENDED:**

1. Tay Vaughan, "Multimedia: Making it work", TMH, Eighth edition. 2006
2. Ralf Steinmetz and Klara Naharstedt, "Multimedia: Computing, Communications Applications", Pearson, 1995.
3. Keyes, "Multimedia Handbook", TMH. 2000.
4. K. Andleigh and K. Thakkar, "Multimedia System Design", PHI, 2000

### **SOFTWARE LAB BASED ON MULTIMEDIA (FLASH AS A MULTIMEDIA S/W):**

Practical exercises based on concepts listed in theory using Flash.

**FLASH:** Concept of Frame, Key frames, Frame rate, Timeline, Tween, Layers, Symbols, Embedding audio/video and embedding on the web page

1. Draw an animation to show a bouncing ball.
2. Draw an animation to show a moving stick man.
3. Draw an animation to show a fainting banana.
4. Draw an animation to show sunrise and sunset.
5. Draw an animation to show a disappearing house.

6. Draw an animation to show two boats sailing in river
7. Draw an animation to show a scene of cricket match.
8. Draw an animation to help teach a poem or a song
9. Draw an animation to show cartoon with a message
10. Make a movie showing Shape Tweening.
11. Make a movie showing Motion Tweening.
12. Add sound and button to the movie

# **CSC-RC-4016: Computer System Architecture**

4 Lectures 4 Practical, Credits 6 (4+2)  
Theory: 60 Lectures, Practical: 60 Lectures

## **UNIT 1: Introduction (12 Lectures)**

Logic gates, boolean algebra, combinational circuits, circuit simplification, flip-flops and sequential circuits, decoders, multiplexors, registers, counters and memory units.

## **UNIT 2: Data Representation and basic Computer Arithmetic (8 Lectures)**

Number systems, complements, fixed and floating point representation, character representation, addition, subtraction, magnitude comparison.

## **UNIT 3: Basic Computer Organization and Design (18 Lectures)**

Computer registers, bus system, instruction set, timing and control, instruction cycle, memory reference, input-output and interrupt.

## **UNIT 4: Central Processing UNIT (10 Lectures)**

Register organization, arithmetic and logical micro-operations, stack organization, micro programmed control.

## **UNIT 5: Programming the Basic Computer (8 Lectures)**

Instruction formats, addressing modes, instruction codes, machine language, assembly language, input output programming.

## **UNIT 6: Input-output Organization (4 Lectures)**

Peripheral devices, I/O interface, Modes of data transfer, direct memory access.

## **REFERENCE BOOKS:**

## COMPUTER SYSTEM ARCHITECTURE LAB

### Practical: 60 Lab Periods

### Basic Computer Instructions

1. Create a machine based on the following architecture:  
Register Set

| Symbol | Hex  |                        | Symbol | Hex  | Symbol | Hex      |
|--------|------|------------------------|--------|------|--------|----------|
| AND    | 0xxx | Indirect<br>Addressing | CLA    | E800 | INP    | F80<br>0 |
| ADD    | 2xxx |                        | CLE    | E400 | OUT    | F40<br>0 |
| ISZ    | Cxxx |                        | INC    | E020 |        |          |
| AND I  | 1xxx |                        | SPA    | E010 |        |          |
| ADD I  | 3xxx |                        | SNA    | E008 |        |          |
| LDA I  | 5xxx |                        | SZA    | E004 |        |          |
| STA I  | 7xxx |                        | SZE    | E002 |        |          |
| BUN I  | 9xxx |                        | HLT    | E001 |        |          |
| BSA I  | Bxxx |                        |        |      |        |          |
| ISZ I  | Dxxx |                        |        |      |        |          |

Refer to Chapter-5 of Morris Mano for description of instructions.

- ii) Create the micro operations and associate with instructions as given in the chapter (except interrupts). Design the register set, memory and the instruction set. Use this machine for the assignments of this section.
- iii) Create a Fetch routine of the instruction cycle.
- iv) Simulate the machine to determine the contents of AC, E, PC, AR and IR registers in hexadecimal after the execution of each of following register reference instructions:

- |        |        |        |
|--------|--------|--------|
| a. CLA | e. CIR | i. SNA |
| b. CLE | f. CIL | j. SZA |
| c. CMA | g. INC | k. SZE |
| d. CME | h. SPA | l. HLT |

Initialize the contents of AC to  $(A937)_{16}$ , that of PC to  $(022)_{16}$  and E to 1.

5. Simulate the machine for the following memory-reference instructions with  $I=0$  and address part = 082. The instruction to be stored at address 022 in RAM. Initialize the memory word at address 082 with the operand B8F2 and AC with A937. Determine the contents of AC, DR, PC, AR and IR in hexadecimal after the execution.

- |        |        |
|--------|--------|
| a. ADD | f. BSA |
| b. AND | g. ISZ |
| c. LDA |        |
| d. STA |        |
| e. BUN |        |

6. Simulate the machine for the memory-reference instructions referred in above question with  $I=1$  and address part = 082. The instruction to be stored at address 026 in RAM. Initialize the memory word at address 082 with the value 298. Initialize the memory word at address 298 with operand B8F2 and AC with A937. Determine the contents of AC, DR, PC, AR and IR in hexadecimal after the execution.

7. Modify the machine created in Practical 1 according to the following instruction format:

**Instruction format**

- a. The instruction format contains a 3-bit opcode, a 1-bit addressing mode and a 12-bit address. There are only two addressing modes,  $I=0$  (direct addressing) and  $I=1$  (indirect addressing).
- b. Create a new register I of 1 bit.

Create two new microinstructions as follows :

- i. Check the opcode of instruction to determine type of instruction (Memory Reference/Register Reference/Input-Output) and then jump accordingly.
- ii. Check the I bit to determine the addressing mode and then jump accordingly.

# CSC-SE-4014: System Administration and Maintenance

02 Lectures 04 Practical, Credits 4 (2+2)  
Theory: 20 Lectures      Practical: 20 Lectures

## UNIT 1: Linux/Unix

(8 Lectures)

- Basics of operating system, services,
- Installation and configuration, maintenance
- What is Linux/Unix Operating systems, Kernel, API, CLI, GUI,
- Difference between Linux/Unix and other operating systems
- Features and Architecture
- Linux features, advantages, disadvantages

## UNIT 2: Windows

(12 Lectures)

- Windows as operating system, history, versions.
- PC hardware, BIOS, Devices and drivers,
- Kernel Configuration and building
- Application installation, configuration and maintenance
- Server services and Client services
- Difference between Windows XP/windows7 and windows server 2003/2008

## SOFTWARE LAB BASED ON SYSTEM ADMINISTRATION AND MAINTENANCE LINUX:

|                                                                           |
|---------------------------------------------------------------------------|
| Linux Desktop tour. Configuring desktop environment and desktop settings. |
|---------------------------------------------------------------------------|

|                                                                                                          |
|----------------------------------------------------------------------------------------------------------|
| <b>Basic Commands</b> :Terminal, shell,Cat, ls, cd, date, cal, man, echo, pwd, Mkdir, rm, rmdir Ps, kill |
|----------------------------------------------------------------------------------------------------------|

|                             |
|-----------------------------|
| <b>Package Installation</b> |
|-----------------------------|

|                          |
|--------------------------|
| Synaptic package manager |
|--------------------------|

### Windows:

|                                     |
|-------------------------------------|
| Creating users – Admin and regular. |
|-------------------------------------|

|                                                              |
|--------------------------------------------------------------|
| Path of their personal files. Adding and changing passwords. |
|--------------------------------------------------------------|

|                                                            |
|------------------------------------------------------------|
| Difference between workgroup and domain. Concept of roles. |
|------------------------------------------------------------|

|                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------|
| user profiles – creating and roaming Concept of Active Directory. Creating active directory in windows 2003/2008. |
|-------------------------------------------------------------------------------------------------------------------|

|                             |
|-----------------------------|
| Process and Disk management |
|-----------------------------|

|                                                 |
|-------------------------------------------------|
| Windows Task manager. File systems – NTFS, FAT. |
|-------------------------------------------------|

|                 |
|-----------------|
| <b>Services</b> |
|-----------------|

|               |
|---------------|
| Control Panel |
|---------------|

|                                                                                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>C:/program Files, C:/system C:/windows</p> <p>Add /remove new hardware (like printer ), Add/remove new programmes.</p>                                                                         |
| <p><b>Network Administration</b></p> <p>Ipconfig, Ping, tracert, route, hostname, net, netstat, whoami</p> <p>Set manual IP address, check connectivity – ipv4, ipv6</p>                          |
| <p><b>Administrator Tools</b></p> <p>Control Panel -&gt; Administrative Tools</p> <p>Computer Management, Local security Policy, Performance Monitor, Task Scheduler, Antivirus and firewall.</p> |
| <p><b>Misc</b></p> <p>Start-&gt;Accessories-&gt;System tools -&gt; All options (Remote desktop, backup/restore etc.)</p> <p><b>LAN</b> – sharing printer, files and folder over the network.</p>  |

## **CSC-SE-4024: HTML Programming**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

|                                                    |                     |
|----------------------------------------------------|---------------------|
| <b>UNIT 1: Introduction</b>                        | <b>(1 Lecture)</b>  |
| <b>UNIT 2: The Basics</b>                          | <b>(2 Lectures)</b> |
| o The Head, the Body                               |                     |
| o Colors, Attributes                               |                     |
| o Lists, ordered and unordered                     |                     |
| <b>UNIT 3: Links</b>                               | <b>(3 Lectures)</b> |
| o Introduction                                     |                     |
| o Relative Links, Absolute Links                   |                     |
| o Link Attributes                                  |                     |
| o Using the ID Attribute to Link Within a Document |                     |
| <b>UNIT 4: Images</b>                              | <b>(3 Lectures)</b> |
| o Putting an Image on a Page                       |                     |
| o Using Images as Links                            |                     |
| o Putting an Image in the Background               |                     |
| <b>UNIT 5: Tables</b>                              | <b>(5 Lectures)</b> |
| o Creating a Table                                 |                     |
| o Table Headers                                    |                     |
| o Captions                                         |                     |

**REFERENCE BOOKS:**

1. Introduction to HTML and CSS, O'Reilly , 2010
2. Jon Duckett, HTML and CSS, John Wiley, 2012

**SOFTWARE LAB BASED ON HTML**

Create an HTML document with the following formatting options:

- I. Bold
- II. Italics
- III. Underline
- IV. Headings (Using H1 to H6 heading styles)
- V. Font (Type, Size and Color)
- VI. Background (Colored background/Image in background)
- VII. Paragraph
- VIII. Line Break
- IX. Horizontal Rule
- X. Pre tag

Create an HTML document which consists of:

- I. Ordered List
- II. Unordered List

III. Nested List

IV. Image

## XYZ Ltd's Update

1. Introduction
2. Company Financial Update
  - o First Quarter
  - o Second Quarter
  - o Third Quarter
  - o Fourth Quarter
3. Advertising Update
  - o Result of Newspaper Campaign
  - o Additions to staff
  - o New Thoughts on Television
4. Human Resources Update

A. Safety Considerations

1. Body substance isolation
2. Sense safety
3. Initial size-up

1. Create an HTML document which implements Internal linking as well as external linking.

2. Create a table using HTML which consists of columns for Roll No., Student's name and grade.

|    |                    | Result |
|----|--------------------|--------|
| 1. | General Impression |        |
| 2. | Unresponsiveness   |        |

- i. Alert to person, place and time
- ii. Verbal response to audible stimuli

3. Create a Table with the following view:

|                                           |  |  |  |
|-------------------------------------------|--|--|--|
| i. Alert to person, place and time        |  |  |  |
| ii. Verbal response to audible stimuli    |  |  |  |
| iii. Alert to verbal or physical response |  |  |  |
| iv. Unresponsive to all stimuli           |  |  |  |

C. Patient Critical Needs

|                                                   |                     |
|---------------------------------------------------|---------------------|
| 1. Airway                                         | Place an image here |
| 2. Breathing                                      |                     |
| i. Use oxygen if indicated                        |                     |
| ii. Consider use of assisting with bag value mask |                     |

3. Circulation

4. Bleeding

Create a form using HTML which has the following types of controls:

- I. Text Box
- II. Option/radio buttons
- III. Check boxes
- IV. Reset and Submit buttons

### Subscribe to XYZ News Magazine and Emails

Create HTML documents (having multiple frames) in the following three formats:  
 Interested in receiving daily small updates of all latest News? Well, now you can. And best of all, it is free! Just fill out this form and submit it by clicking the "send it In" button. We will put you on our mailing list and you will receive your first email in 3-5 days.

|--------|--------|
| Frame1 |        |
| Frame2 | Frame3 |

# **CSC-SE-5014: Programming with VB/GAMBAS**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

## **UNIT 1: GUI Environment (2 Lectures)**

Introduction to graphical user interface (GUI), programming language (procedural, object oriented, event driven), the GUI environment, compiling, debugging, and running the programs.

## **UNIT 2: Controls (4 Lectures)**

Introduction to controls textboxes, frames, check boxes, option buttons, images, setting borders and styles, the shape control, the line control, working with multiple controls and their properties, designing the user interface, keyboard access, tab controls, default & cancel property, coding for controls.

## **UNIT 3: Operations (3 Lectures)**

Data types, constants, named & intrinsic, declaring variables, scope of variables, val function, arithmetic operations, formatting data.

## **UNIT 4: Decision Making (5 Lectures)**

If statement, comparing strings, compound conditions (and, or, not), nested if statements, case structure, using if statements with option buttons & check boxes, displaying message in message box, testing whether input is valid or not.

## **UNIT 5: Forms Handling (3 Lectures)**

Multiple forms creating, adding, removing forms in project, hide, show method, load, unload statement, me keyword, referring to objects on a different forms.

## **UNIT 6: Iteration Handling: (3 Lectures)**

Do/loops, for/next loops, using msgbox function, using string function.

## **BOOK RECOMMENDED:**

1. Julia Case Bradley, Anita C. Millispangh, Programming in Visual Basic 6.0, Tata Mcgraw Hill Edition 2000 (Fourteenth Reprint 2004).

## **SOFTWARE LAB BASED ON VISUAL BASIC:**

Practical exercises based on concepts listed in theory using VB.

1. Write a VB application to compute the sum of two variables.
2. Write a VB application to compute the factorial of a number n.
3. Write a VB application to compute the Fibonacci series of a number n.
4. Write a VB application to compute the series of prime numbers till number n.
5. Write a VB application to compute the maximum of three numbers.
6. Write a VB application to compute the sum of odd numbers and even numbers in an array of n integers.
7. Write a VB application to compare the strings.
8. Write a VB application to make a calculator.
9. Write a VB application to choose your hobbies from a list.
10. Write a VB application to illustrate the use of color radio button.
11. Write a VB application to illustrate the use of color scroll bar form.
12. Write a VB application to illustrate the use of color scroll bar label text.
13. Write a VB application to illustrate the use of color text box.

14. Write a VB application to show a timer.

## **CSC-SE-5024: PHP Programming**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures      (1 +2 Lab)

### **UNIT 1: Introduction to PHP**

**(4 Lectures)**

PHP introduction, inventions and versions, important tools and software requirements (like Web Server, Database, Editors etc.), PHP with other technologies, scope of PHP, Basic Syntax, PHP variables and constants, Types of data in PHP , Expressions, scopes of a variable (local, global), PHP Operators : Arithmetic, Assignment, Relational , Logical operators, Bitwise , ternary and MOD operator, PHP operator Precedence and associativity

### **UNIT 2: Handling HTML form with PHP**

**(2 Lectures)**

Capturing Form Data, GET and POST form methods, Dealing with multi value fields, Redirecting a form after submission

### **UNIT 3: PHP conditional events and Loops**

**(3 Lectures)**

PHP IF Else conditional statements (Nested IF and Else), Switch case, while, For and Do While Loop, Goto, Break, Continue and Exit

### **UNIT 4: PHP Functions**

**(3 Lectures)**

Function, Need of Function, declaration and calling of a function, PHP Function with arguments, Default Arguments in Function, Function argument with call by value, call by reference, Scope of Function Global and Local

### **UNIT 5: String Manipulation and Regular Expression**

**(4 Lectures)**

Creating and accessing String , Searching & Replacing String, Formatting, joining and splitting String, String Related Library functions, Use and advantage of regular expression over inbuilt function, Use of preg\_match(), preg\_replace(), preg\_split() functions in regular expression

### **UNIT 6: Array**

**(4 Lectures)**

Anatomy of an Array ,Creating index based and Associative array ,Accessing array, Looping with Index based array, with associative array using each() and foreach(), Some useful Library function

### **SOFTWARE LAB BASED ON PHP:**

1. Create a PHP page using functions for comparing three integers and print the largest number.
2. Write a function to calculate the factorial of a number (non-negative integer). The function accept the number as an argument.
3. WAP to check whether the given number is prime or not.
4. Create a PHP page which accepts string from user. After submission that page displays the reverse of provided string.
5. Write a PHP function that checks if a string is all lower case.
6. Write a PHP script that checks whether a passed string is palindrome or not? ( A palindrome is word, phrase, or sequence that reads the same backward as forward, e.g., madam or nurses run)
7. WAP to sort an array.
8. Write a PHP script that removes the whitespaces from a string.  
Sample string : 'The quick " " brown fox'

Expected Output : Thequick""brownfox

9. Write a PHP script that finds out the sum of first n odd numbers.
10. Create a login page having user name and password. On clicking submit, a welcome message should be displayed if the user is already registered (i.e.name is present in the database) otherwise error message should be displayed.
11. Write a PHP script that checks if a string contains another string.
12. Create a simple 'birthday countdown' script, the script will count the number of days between current day and birth day.
13. Create a script to construct the following pattern, using nested for loop.  
\*  
\* \*  
\* \* \*  
\* \* \* \*  
\* \* \* \* \*
14. Write a simple PHP program to check that emails are valid.
15. WAP to print first n even numbers.
16. \$color = array('white', 'green', 'red')  
Write a PHP script which will display the colors in the following way :  
Output : white, green, red,
  - green
  - red
  - white
17. Using switch case and dropdown list display a “Hello” message depending on the language selected in drop down list.
18. Write a PHP program to print Fibonacci series using recursion.
19. Write a PHP script to replace the first 'the' of the following string with 'That'.

**Sample :** 'the quick brown fox jumps over the lazy dog.'

**Expected Result :** That quick brown fox jumps over the lazy dog.

## **CSC-RE-5016: Project Work/Dissertation**

4 Lectures 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

- The students will be allowed to work on any project based on the concepts studied in core/elective or skill based elective courses.
- The group size should be maximum of three (03) students.
- Each group will be assigned a teacher as a supervisor who will handle both their theory as well lab classes.
- A maximum of Four (04) projects would be assigned to one teacher.
- Theory classes will cover project management techniques.

## CSC-SE-6014: Programming with SCILAB

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

### UNIT 1 (2 Lectures)

Introduction to Programming: Components of a computer, working with numbers, Machine code, software hierarchy.

### UNIT 2 (3 Lectures)

Programming Environment: SCILAB Environment, Workspace, Working Directory, Expressions, Constants, Variables and assignment statement, Arrays.

### UNIT 3 (3 Lectures)

Graph Plots: Basic plotting, Built in functions, Generating waveforms, Sound replay, load and save.

### UNIT 4 (4 Lectures)

Matrices and Some Simple Matrix Operations, Sub- Matrices.

### UNIT 5 (4 Lectures)

Procedures and Functions: Arguments and return values

### UNIT 6 (3 Lectures)

Control Statements: Conditional statements: If, Else, Else-if, Repetition statements: While, for loop.

### UNIT 7 (4 Lectures)

Manipulating Text: Writing to a text file, Reading from a text file, Randomizing and sorting a list, searching a list.

### REFERENCE BOOKS:

1. M.Affouf, SCILAB by Example , CreateSpace Independent Publishing Platform,2012
2. H. Ramchandran, A.S. Nair, SCILAB , S.Chand, 2011

### SOFTWARE LAB BASED ON SCILAB:

1. Write a program to assign the following expressions to a variable A and then to print out the value of A.
  - a.  $(3+4)/(5+6)$
  - b.  $2\pi^2$
  - c.  $\sqrt{2}$  )  $\times 0.4567 \times 10^{-4}$
  - d.  $(0.0000123 + 5.67 \times 10^{-3})$

2. Celsius temperatures can be converted to Fahrenheit by multiplying by 9, dividing by 5, and adding 32. Assign a variable called C the value 37, and implement this formula to assign a variable F the Fahrenheit equivalent of 37 Celsius.
3. Set up a vector called N with five elements having the values: 1, 2, 3, 4, 5. Using N, create assignment statements for a vector X which will result in X having these values:
  - a. 2, 4, 6, 8, 10
  - b. 1/2, 1, 3/2, 2, 5/2
  - c. 1, 1/2, 1/3, 1/4, 1/5
  - d. 1, 1/4, 1/9, 1/16, 1/25
4. A supermarket conveyor belt holds an array of groceries. The price of each product (in pounds) is [ 0.6, 1.2 ,0.5, 1.3 ] ; while the numbers of each product are [ 3, 2 ,1 ,5 ]. Use MATLAB to calculate the total bill.
5. The `sortrows(x)` function will sort a vector or matrix X into increasing row order. Use this function to sort a list of names into alphabetical order.
6. The “identity” matrix is a square matrix that has ones on the diagonal and zeros elsewhere. You can generate one with the `eye()` function in MATLAB. Use MATLAB to find a matrix B, such that when multiplied by matrix  $A = \begin{bmatrix} 1 & 2 \\ -1 & 0 \end{bmatrix}$  the identity matrix  $I = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$  is generated. That is  $A*B=I$ .
7. Create an array of N numbers. Now find a single MATLAB statement that picks out from that array the 1,4,9,16,...,√Nth entries, i.e. those numbers which have indices that are square numbers.
8. Draw a graph that joins the points (0,1), (4,3), (2,0) and (5,-2).
9. The seeds on a sunflower are distributed according to the formula below. Plot a small circle at each of the first 1000 co-ordinates :

$$r_n = \sqrt{n}$$

$$\theta_n = \frac{137.51}{180} \pi n$$

10. Calculate 10 approximate points from the function  $y=2x$  by using the formulae:
  - i.  $x_n = n$
  - ii.  $y_n = 2n + \text{rand} - 0.5$
 Fit a line of best fit to these points using the function `polyfit()` with `degree=1`, and generate co-ordinates from the line of best fit using `polyval()`. Use the on-line help to find out how to use these functions. Plot the raw data and the line of best fit.
11. Calculate and replay 1 second of a sinewave at 500Hz with a sampling rate of 11025Hz. Save the sound to a file called "ex35.wav". Plot the first 100 samples.
12. Calculate and replay a 2 second chirp. That is, a sinusoid that steadily increases in frequency with time, from say 250Hz at the start to 1000Hz at the end.
13. Build a square wave by adding together 10 odd harmonics: 1f, 3f, 5f, etc. The amplitude of the nth harmonic should be 1/n. Display a graph of one cycle of the result superimposed on the individual harmonics.
14. Write a function called `FtoC` (`ftoc.m`) to convert Fahrenheit temperatures into Celsius. Make sure the program has a title comment and a help page. Test from the command window with:
  - i. `FtoC(96)`
  - ii. `lookfor Fahrenheit`
  - iii. `help FtoC`
15. Write a program to input 2 strings from the user and to print out (i) the concatenation of the two strings with a space between them, (ii) a line of asterisks the same length as the concatenated strings, and (iii) the reversed concatenation. For example:
  - i. Enter string 1: Mark

- ii. Enter string 2: Huckvale
- iii. Mark Huckvale
- iv. \*\*\*\*\*
- v. elavkcUH kraM

## **CSC-SE-6024: Android Programming**

02 Lectures 04 Practical, Credits 4 (2+2)

Theory: 20 Lectures      Practical: 20 Lectures

### **UNIT 1: Introduction (2 Lectures)**

History of Android, Introduction to Android Operating Systems, Android Development Tools, Android Architecture.

### **UNIT 2: Overview of object oriented programming using Java (4 Lectures)**

OOPs Concepts: Inheritance, Polymorphism, Interfaces, Abstract class, Threads, Overloading and Overriding, Java Virtual Machine.

### **UNIT 3: Development Tools (5 Lectures)**

Installing and using Eclipse with ADT plug-in, Installing Virtual machine for Android sandwich/Jelly bean (Emulator), configuring the installed tools, creating a android project – Hello Word, run on emulator, Deploy it on USB-connected Android device.

### **UNIT 4: User Interface Architecture (3 Lectures)**

Application context, intents, Activity life cycle, multiple screen sizes.

### **UNIT 5: User Interface Design (3 Lectures)**

Form widgets, Text Fields, Layouts, Button control, toggle buttons, Spinners (Combo boxes), Images, Menu, and Dialog.

### **UNIT 6: Database (3 Lectures)**

Understanding of SQLite database, connecting with the database.

### **REFERENCE BOOK:**

1. Android application development for java programmers. By James C. Sheusi. Publisher: Cengage Learning, 2013.

### **ONLINE READING / SUPPORTING MATERIAL:**

1. <http://www.developer.android.com>
2. <http://developer.android.com/about/versions/index.html>
3. <http://developer.android.com/training/basics/firstapp/index.html>
4. <http://docs.oracle.com/javase/tutorial/index.htm> (Available in the form of free downloadable ebooks also).
5. <http://developer.android.com/guide/components/activities.html>
6. <http://developer.android.com/guide/components/fundamentals.html>
7. <http://developer.android.com/guide/components/intents-filters.html>.
8. <http://developer.android.com/training/multiscreen/screensizes.html>
9. <http://developer.android.com/guide/topics/ui/controls.html>
10. <http://developer.android.com/guide/topics/ui/declaring-layout.html>
11. <http://developer.android.com/training/basics/data-storage/databases.html>

## **Software Lab Based on Android Programming:**

1. Create “Hello World” application. That will display “Hello World” in the middle of the screen in the emulator. Also display “Hello World” in the middle of the screen in the Android Phone.
2. Create an application with login module. (Check username and password).
3. Create spinner with strings taken from resource folder (res >> value folder) and on changing the spinner value, Image will change.
4. Create a menu with 5 options and selected option should appear in text box.
5. Create a list of all courses in your college and on selecting a particular course teacher-in-charge of that course should appear at the bottom of the screen.
6. Create an application with three option buttons, on selecting a button colour of the screen will change.
7. Create and Login application as above. On successful login, pop up the message.
8. Create an application to Create, Insert, update, Delete and retrieve operation on the database.

## **CSC-RE-6016: Programming in Java**

Total marks: 150 (Theory: 80, Practical: 40, Internal Assessment: 30)

4 Lectures 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

### **UNIT 1: Introduction to Java**

**(1 Lecture)**

Features of Java, JDK Environment

### **UNIT 2: Object Oriented Programming Concept**

**(10 Lectures)**

Overview of Programming, Paradigm, Classes, Abstraction, Encapsulation, Inheritance, Polymorphism, Difference between C++ and JAVA

### **UNIT 3: Java Programming Fundamental**

**(10 Lectures)**

Structure of java program, Data types, Variables, Operators, Keywords, Naming Convention, Decision Making (if, switch), Looping (for, while), Type Casting

### **UNIT 4: Classes and Objects**

**(10 Lectures)**

Creating Classes and objects, Memory allocation for objects, Constructor, Implementation of Inheritance, Implementation of Polymorphism, Method Overloading, Method Overriding, Nested and Inner classes

### **UNIT 5: Arrays and Strings**

**(6 Lectures)**

Arrays, creating an array, Types of Arrays, String class Methods, String Buffer methods.

### **UNIT 6: Abstract Class, Interface and Packages**

**(8 Lectures)**

Modifiers and Access Control, Abstract classes and methods, Interfaces, Packages Concept, Creating user defined packages

### **UNIT 7: Exception Handling**

**(4 Lectures)**

Exception types, Using try catch and multiple catch, Nested try, throw, throws and finally, Creating User defined Exceptions.

### **UNIT 8: File Handling**

**(5 Lectures)**

Byte Stream, Character Stream, File IO Basics, File Operations, Creating file, Reading file, Writing File

### **UNIT 9: Applet Programming**

**(6 Lectures)**

Introduction, Types Applet, Applet Life cycle, Creating Applet, Applet tag

### **REFERENCE BOOK:**

1. Ivan Bayross, Web Enabled Commercial Application Development Using Html, Dhtml, javascript, Perl Cgi , BPB Publications, 2009.
2. Cay Horstmann, BIG Java, Wiley Publication , 3rd Edition., 2009
3. Herbert Schildt , Java 7, The Complete Reference, , 8th Edition, 2009.
4. E Balagurusamy , Programming with JAVA, TMH, 2007

## SOFTWARE LAB BASED ON JAVA

1. WAP to find the largest of n natural numbers.
2. WAP to find whether a given number is prime or not.
3. Write a menu driven program for following:
  - a. Display a Fibonacci series
  - b. Compute Factorial of a number
  - c. WAP to check whether a given number is odd or even.
  - d. WAP to check whether a given string is palindrome or not.
4. WAP to print the sum and product of digits of an Integer and reverse the Integer.
5. Write a program to create an array of 10 integers. Accept values from the user in that array. Input another number from the user and find out how many numbers are equal to the number passed, how many are greater and how many are less than the number passed.
6. Write a program that will prompt the user for a list of 5 prices. Compute the average of the prices and find out all the prices that are higher than the calculated average.
7. Write a program in java to input N numbers in an array and print out the Armstrong numbers from the set.
8. Write java program for the following matrix operations:
  - a. Addition of two matrices
  - b. Summation of two matrices
  - c. Transpose of a matrix
  - d. Input the elements of matrices from user.
9. Write a java program that computes the area of a circle, rectangle and a Cylinder using function overloading.
10. Write a Java for the implementation of Multiple inheritance using interfaces to calculate the area of a rectangle and triangle.
11. Write a java program to create a frame window in an Applet. Display your name, address and qualification in the frame window.
12. Write a java program to draw a line between two coordinates in a window.
13. Write a java program to display the following graphics in an applet window.
  - a. Rectangles
  - b. Circles
  - c. Ellipses
  - d. Arcs
  - e. Polygons
14. Write a program that reads two integer numbers for the variables a and b. If any other character except number (0-9) is entered then the error is caught by NumberFormatException object. After that ex.getMessage() prints the information about the error occurring causes.
15. Write a program for the following string operations:
  - a. Compare two strings
  - b. Concatenate two strings
  - c. Compute length of a string
16. Create a class called Fraction that can be used to represent the ratio of two integers. Include appropriate constructors and methods. If the denominator becomes zero, throw and handle an exception.

## **CSC-RE-6026: Computer Networks**

4 Lectures 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

### **UNIT 1: Basic concepts (16 Lectures)**

Components of data communication, standards and organizations, Network Classification, Network Topologies ; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite.

### **UNIT 2: Physical Layer (6 Lectures)**

Cabling, Network Interface Card, Transmission Media Devices- Repeater, Hub, Bridge, Switch, Router, Gateway.

### **UNIT 3: Data Link Layer (8 Lectures)**

Framing techniques; Error Control; Flow Control Protocols; Shared media protocols - CSMA/CD and CSMA/CA.

### **UNIT 4: Network Layer (8 Lectures)**

Virtual Circuits and Datagram approach, IP addressing methods – Subnetting; Routing Algorithms (adaptive and non-adaptive)

### **UNIT 5: Transport Layer (6 Lectures)**

Transport services, Transport Layer protocol of TCP and UDP

### **UNIT 6: Application Layer (10 Lectures)**

Application layer protocols and services – Domain name system, HTTP, WWW, telnet, FTP, SMTP

### **UNIT 7: Network Security (6 Lectures)**

Common Terms, Firewalls, Virtual Private Networks

### **REFERENCE BOOKS:**

1. B.A. Forouzan: Data Communication and Networking, 4th Edition, Tata McGraw Hill, 2007.
2. D.E. Comer, Internetworking with TCP/IP, Vol. I, Prentice Hall of India, 1998.
3. W. Stalling, Data & Computer Communication, 8th edition, Prentice Hall of India, 2006.
4. D. Bertsekas, R. Gallager, Data Networks, 2nd edition, Prentice Hall of India, 1992.

### **SOFTWARE LAB BASED ON COMPUTER NETWORKS:**

Implement the concepts of Computer Networks such as:

1. Simulate Checksum Algorithm.
2. Simulate CRC Algorithm
3. Simulate Stop & Wait Protocol.
4. Simulate Go-Back-N Protocol.
5. Simulate Selective Repeat Protocol.

## **CSC-RE-6036: Mobile Applications**

4 Lectures 4 Practical, Credits 6 (4+2)

Theory: 60 Lectures, Practical: 60 Lectures

### **UNIT 1: Event Driven Programming (7 Lectures)**

UI event loop, Threading for background tasks, Outlets / actions, delegation, notification, Model View Controller (MVC) design pattern.

### **UNIT 2: Mobile application issues (8 Lectures)**

Limited resources (memory, display, network, file system), input / output (multi-touch and gestures), sensors (camera, compass, accelerometer, GPS)

### **UNIT 3: Development tools (8 Lectures)**

Apple iOS tool chain: Objective-C, Xcode IDE, Interface Builder, Device simulator.

### **UNIT 4: Frameworks (8 Lectures)**

Objective-C and Foundation Frameworks, Cocoa Touch, UIKit, Others: Core Graphics, Core Animation, Core Location and Maps, Basic Interaction.

### **UNIT 4: Common UI's for mobile devices (7 Lectures)**

Navigation Controllers, Tab Bars, Table Views, Modal views, UI Layout.

### **UNIT 5: Data Persistence (8 Lectures)**

Maintaining state between application invocations, File system, Property Lists, SQLite, Core Data

### **UNIT 6: Remote Data-Storage and Communication (8 Lectures)**

"Back End" / server side of application, RESTful programming, HTTP get, post, put, delete, database design, server side JavaScript / JSON

### **UNIT 7: Code signing (6 Lectures)**

Security, Keychain, Developers and App Store License Agreement

### **REFERENCE BOOKS:**

- Rajiv Ramnath, Roger Crawfis, and Paolo Sivilotti, Android SDK 3 for Dummies, Wiley, 2011.
